Re: East Trunk Sewer - Phase 2, Project 64-36

Dear Mr. McKinnon:

Reference is made to our telephone conversation of March 5, 1965, regarding the alignment of the Phase 2 portion of the East Trunk Sewer.

It is our intention to align the sewer on the Moffett Boulevard centerline and the northerly extension thereof to the point of intersection with the easterly extension of the Phase 1 alignment out of manhole No. 13. The "S" curve on Moffett Boulevard near the Moffett Field entrance will be traversed by straight runs of pipe using manholes at the angle points.

It is intended to cross Bayshore Freeway on the Moffett Boulevard alignment. It is hoped that the State will favorably consider a request for the allowance of an open pit in the Freeway median to allow jacking from both directions. We anticipate requesting assistance from your office in State negotiations.

The alignment on Fairchild Drive will be dictated in part by the available spaces; however, it is intended to position the sewer parallel to the street alignment.

We have requested title reports for affected properties in separate copy.

Very truly yours,

PAUL L. ADAMSON

Paul L. Adamson
